Wearable signals
60-s windows → features x
Angle encoding
$\theta = \pi \tanh(\gamma g)$
Eq. (1)
untrained quantum reservoir
Quantum reservoir
Eq. (2)
ring ZZ, noise
Readout features
$\langle X, Y, Z \rangle, \langle ZZ \rangle$
$V = 3$ sub-steps
Ridge readout
linear score
$\lambda = 1$
Conformal alarm
$\alpha = 0.10$
$m = 3$ windows
fixed · no gradients
only trained component
